WORK EXPERIENCE

Robinhood (Portfolio Product)

Senior Software Engineer

Bellevue, WA

February 2023 - Present

- Led architecture and cross-team execution of Company Insider and Politician Profiles in Robinhood Social, integrating multiple internal services and third-party market data to support scalable public portfolio identity.
- Initiated and led a 5-engineer Portfolio Correctness initiative, architecting reconciliation pipelines and reducing account mismatches from 2% to <0.5% across 27 million accounts, improving financial accuracy and customer trust.
- Architected and delivered the Realized Profit & Loss platform powering historical portfolio value in the Robinhood app, establishing scalable computation and storage patterns used by 4 internal teams.
- Designed and owned per-asset type portfolio performance infrastructure, coordinating 5 engineers and 2 program managers to deliver consistent, high-accuracy account performance across asset classes, serving tens of thousands request per second.
- Automated IPO Access operational workflows, building systems that supported 23 IPO launches with minimal incremental engineering effort and reduced manual intervention.

Microsoft Corp. (Azure SQL Control Plane)

Senior Software Engineer

Redmond, WA

June 2016 - January 2023

- Architected and led cross-organization automation framework for Azure SQL regional expansion, reducing infrastructure buildout time from 5 weeks to 1 week and enabling 13 region launches under tight timelines.
- Re-architected SQL Synapse control-plane workflows to leverage a shared Finite State Machine framework, eliminating duplicated logic and improving maintainability, extensibility, and operational consistency.
- Designed and delivered SQL Managed Instance Pools, driving customer adoption while collaborating directly with enterprise technical leads to ensure production readiness.
- Implemented subscription-level APIs for SQL Reserved Instances, contributing \$100K+ revenue on launch day and enabling scalable billing integration.
- Designed restore orchestration for high-storage databases and led initiative to achieve 100% test coverage, improving reliability and incident response confidence.
- Established onboarding and mentorship program for 10+ new engineers, standardizing system ramp-up and strengthening on-call readiness across the team.

LinkedIn Corp. (Search Applications)

Software Engineer Intern

Mountain View, CA

May 2015 - August 2015

- Created full-stack code base for mobile caching on search, with backend API service (Java 8), and IOS (Swift).

ShoreTel Inc. (System Management & Web Administration)

Software Engineer Intern

Sunnyvale, CA

May 2014 - Aug. 2014

- Migrated legacy system from VB services to C++ utilizing Open Database Connectivity and company-developed APIs.

TECHNICAL SKILLS

Languages: Golang, C#, Java, Python, Scala, Swift, Solidity

Experiences: AWS, Azure, SQL, DynamoDB, Postgres, Kafka, Github, Jira, Production Service Maintenance, Distributed System Designs, Engineering Mentorship

PERSONAL PROJECTS & ACTIVITIES

Real-time Stock Recommendation Service

2017 - 2020

Ethereum NFT Smart Contract

2022

EDUCATION

Rice University, Houston, TX

Master of Computer Science

Aug. 2015 - May 2016

Rice University, Houston, TX

B.A. in Computer Science

Aug. 2012 - May 2015

TEACHING EXPERIENCE

Teaching Assistant of COMP 215: Introduction to Program Design (Java)

Aug. 2014 - Dec. 2015

Teaching Assistant of COMP 322: Fundamentals of Parallel Programming (Java)

Jan. 2015 - May 2015
